

## Full-time developer for FinTech Startup (EXIST grant)

The ability to **structure digital data** has become an essential skill of successful businesses. Especially **the financial industry** is at the very beginning of **undergoing dramatic changes**. MergerSpot is a Munich based startup that uses **Machine Learning** to automate the **Mergers & Acquisitions process**. Our SaaS solution enables financial analysts to quickly understand specific markets and identify suitable investment targets at the right time. We are supported by the **UnternehmerTUM**, the Center for Digital Technology Management (CDTM) and the venture capitalist **Falk Strasczeg**.

### Your work:

You will join our technical team and take over the development of one of our core Software systems. You will have the opportunity to apply your expertise in developing an intelligent automation solution in a highly dynamic Startup environment and assist us during our launch next year. You will be funded by the EXIST grant for 1 year, with the possibility to join the team as Co-Founder with equity afterwards.

### Your profile:

- Fluency in either Python3 or Javascript
- Ideally experience in developing microservice architectures and full-stack applications
- Interested in Machine Learning (ideally with practical experience)
- Experience with Agile development practices (e.g. Scrum)
- Exceptional motivation to disrupt the financial industry

### Our offer:

- Direct contribution to our product and company development
- Work with **innovative** technologies
- Expertise in developing intelligent automation solutions
- Flexible work environment
- A **challenging startup environment** with an experienced entrepreneurial team
- Frequent Nerf gun battles
